# **Power Supplies**

More Than A Lamp Manufacturer

Who better to design a lamp power supply than the lamp manufacturer themselves. **BHK** offers a complete line of power supplies specifically designed to power **BHK's** full line of light source products. This "Systems Approach" to application-specific lighting ensures maximum overall system performance and lamp life.

BHK's power supply line is divided into three categories: <u>AC Stand-Alone Supplies:</u>

These AC power supplies have been designed to readily operate **BHK** lamps in a laboratory bench top environment.

#### AC Power Transformers:

A variety of AC Power Transformers for OEM applications, designed for **BHK's** Mercury, Cadmium, Zinc and Grid Lamps.

#### DC Solid State Supplies:

Compact state-of-the-art PC Board Mountable designs for OEM applications. Operations are set at a frequency of 27KHz typically and specific for 1" and 2" lighted length Mercury Analamps. PC Board mounted supplies include internal EMI/RFI Shielding.

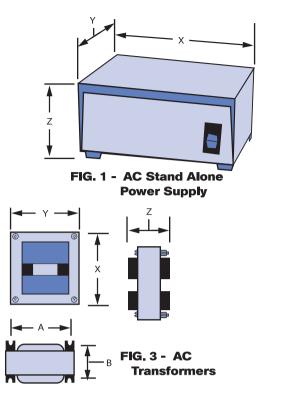

For a complete optical feedback controlled system with 0.1% stability, please refer to our *Lamp Manager™ Brochure* for more information.

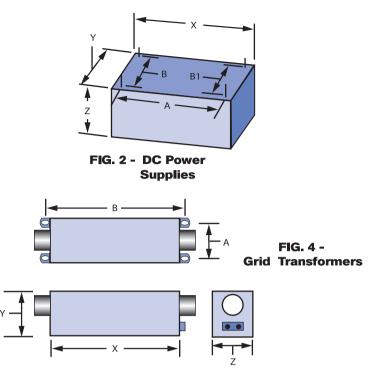

### Features

...........

- Power Supplies Designed Specifically for BHK Lamps and Light Sources
- DC Power Supplies
- OEM Laboratory Power Supplies
- OEM Transformers
- High Frequency Power Supplies
- Custom Designs Available
- ISO 9001:2008 Certified

## **Power Supplies**

RG=Rare Gas Lamps

NOTE: For information on our complete lamp management system, please see our "Lamp Manager" data sheet.

\* Unless otherwise specified

\*\* This power supply is triggered electrically with a separate 5Vdc switch incorporated into the unit. Contact us for more details.

WARRANTY - 1 Year Parts & Labor.
